### DETAILED ACTION

This office action is in response to the amendment filed 09/30/04. A new ground of rejection is introduced as necessitated by amendment.

#### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3 and 19-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Kinoshita et al. (USP 6150800).

As to claims 1 and 19, Kinoshita et al.'s figure 14 shows a circuit comprising: a first transistor (61) having a first terminal, a second terminal and a first gate terminal, wherein the first terminal is coupled to a power supply, and a filter (68, 66) coupled between the power supply and the first gate terminal; a second transistor (1) having a third terminal, a fourth terminal and a second gate terminal, wherein the third terminal is coupled to the second terminal to have the first transistor supply current to the second transistor, and wherein the fourth terminal is an output terminal to provide an output voltage (out); and an operational amplifier circuit (2) having its amplifier output coupled to the second gate terminal, wherein the fourth terminal is coupled to a feedback network of the operational amplifier circuit to regulate the output voltage.

As to claims 2 and 20, figure 14 shows that the filter is to reduce noise from the power supply at the first gate terminal.

Art Unit: 2816

As to claims 3 and 21, figure 14 shows that the filter is a low pass filter.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 8 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kinoshita et al. (USP 6150800).

Kinoshita et al.'s figure 14 shows all limitations of the claim except for voltage REF is generated by a band-gap circuit. However, it is notoriously well known in the art that band-gap voltage generator generates voltage independent of temperature. Therefore, it would have been obvious to one having ordinary skill in the art to use band-gap voltage generator to generate the REF voltage in Kinoshita et al.'s figure 14 for the purpose of improving the performance of the circuit.

***Allowable Subject Matter***

5. Claims 4 and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 4 and 22 would be allowable because the prior art fails to teach or suggest that the filter circuit is an RC filter.

*Conclusion*

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

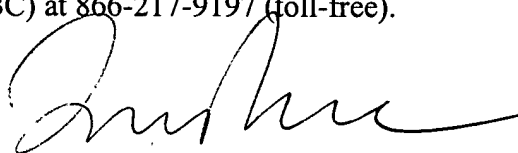

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
